|--|--------------|
| 1 Apologies for Absence | |
| To receive any apologies for absence. | |
| 2 Declarations of Interest | |
| To note any pecuniary declarations of interest. | |
| 3 Minutes of the Previous Meeting | 1 - 4 |
| To approve the Minutes of the meeting held on the 31st March 2021. | |

4 Work Programme 5 - 12

The Committee will note the Work Programme and suggest further items for consideration, where appropriate.

5 Shaping Our Future Programme Update 13 - 70

To note the report to Cabinet on progress with the Shaping our Future Programme and consider any recommendations to Cabinet.

6 Date of Next Meeting

To note that the date of the next meeting is 29th September at 5pm.

GENERAL INFORMATION

IF YOU WOULD LIKE A VERSION OF THIS AGENDA, OR ANY OF ITS REPORTS, IN LARGE PRINT, BRAILLE, AUDIO OR IN ANOTHER LANGUAGE PLEASE CONTACT DEMOCRATIC SERVICES ON 023 9244 6231

Internet

This agenda and its accompanying reports can also be found on the Havant Borough Council website: www.havant.gov.uk

Public Attendance and Participation

Members of the public are welcome to attend the Public Service Plaza and observe the meetings. Many of the Council's meetings allow the public to make deputations on matters included in the agenda. Rules govern this procedure and for further information please get in touch with the contact officer for this agenda.

Disabled Access

The Public Service Plaza has full access and facilities for the disabled.

Emergency Procedure

Please ensure that you are familiar with the location of all emergency exits which are clearly marked. In the unlikely event of an emergency an alarm will sound.

PLEASE EVACUATE THE BUILDING IMMEDIATELY.

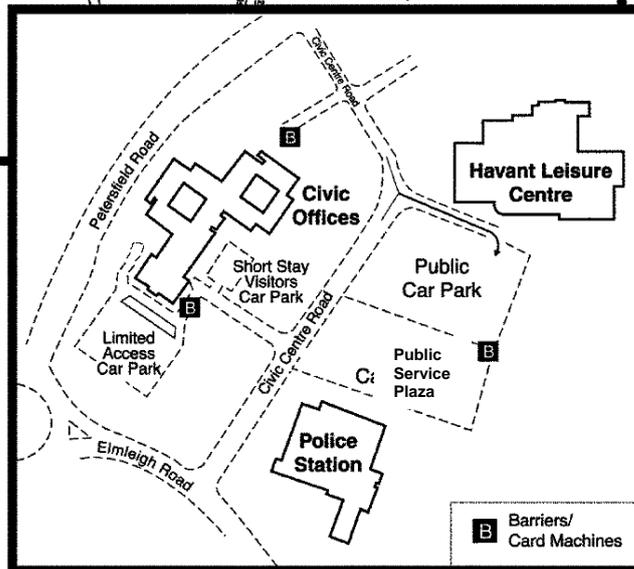

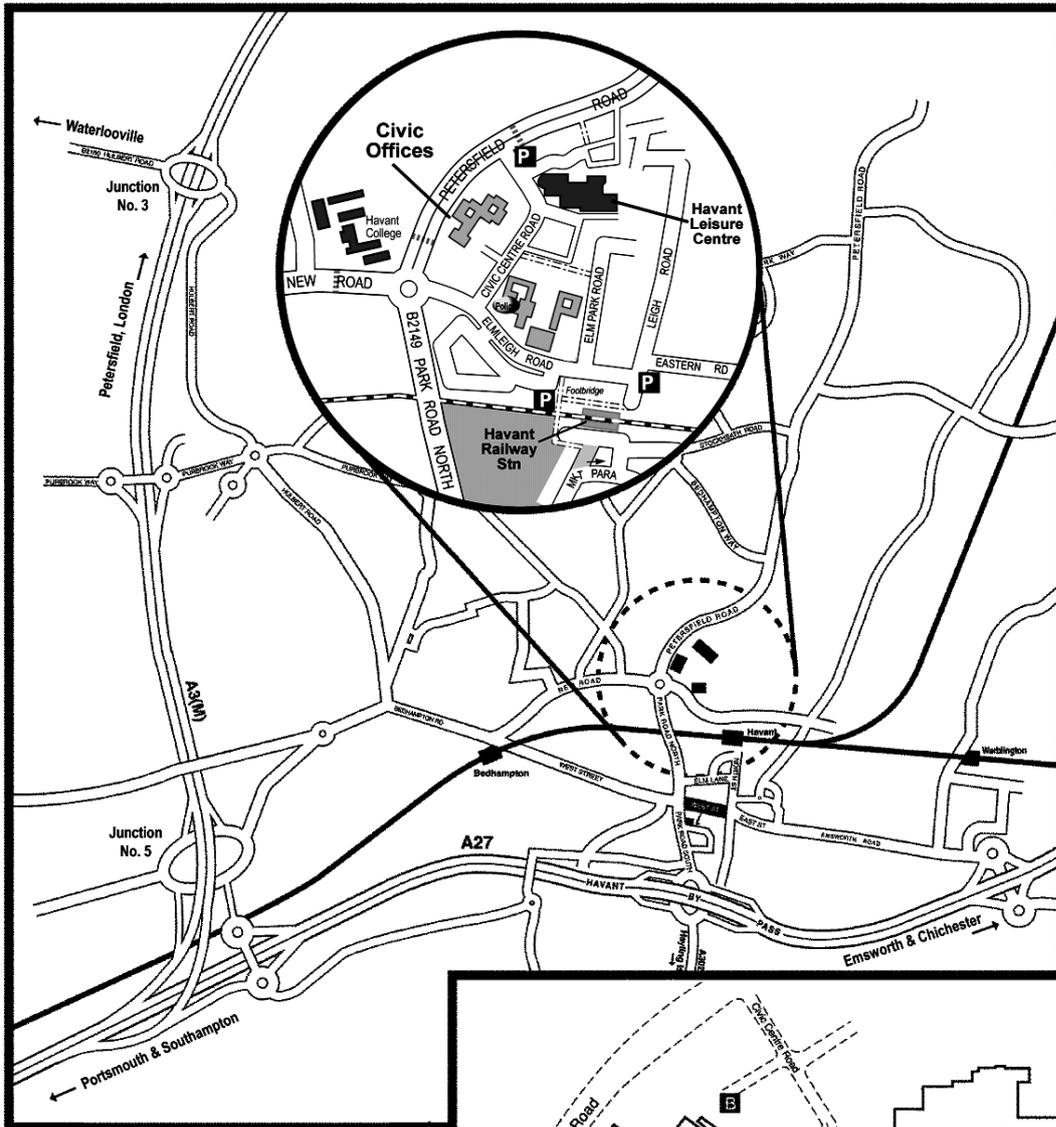

DO NOT RE-ENTER THE BUILDING UNTIL AUTHORISED TO DO SO

No Smoking Policy

The Public Service Plaza operates a strict No Smoking policy in all of its offices, corridors, meeting rooms and toilets.

Parking

Pay and display car parking is available in the Leisure Centre car park opposite the Plaza.

HAVANT BOROUGH COUNCIL

At a meeting of the Overview and Scrutiny Committee held on 31 March 2021

Present

Councillors Lloyd (Chairman), Briggs, Carpenter, Crellin, Francis (Vice-Chairman), Howard, Jenner, Milne, Robinson, Sceal, Scott and Weeks

1 Apologies for Absence

Apologies were received from Councillors Bains and Kennett.

2 Declarations of Interests

There were no declarations of interest.

3 Chairman's Announcements

There were no Chairman's announcements.

4 Work Programme

The Committee's Work Programme was noted.

RESOLVED: That the Work Programme be approved.

5 Review of the Council's Response to the First Wave of the COVID-19 Pandemic

The Committee received five reports completed by Task & Finish groups regarding the Council's response to the first wave of the Covid-19 pandemic. The reviews were carried out in 2020 by the three scrutiny boards: Governance, Audit & Finance, Operations and Place Shaping Board and the Business & Commercial Services Board.

The Chairman introduced the two reports of the Task and Finish groups which she had chaired. These had considered the council's Communications within the first wave of the Covid 19 pandemic and its delivery of Community Support within the first wave. There were no specific recommendations within the first of these reports, as they were included within the community support report. It was noted that recommendations 1,2,3,4,7,8 and 9 of the report had been implemented by the Council during the period that the Review was being undertaken. Recommendation 10 had been superseded by events, and she proposed that it was unnecessary that this recommendation be made. It was agreed that recommendations 1 to 9 within the report be approved and submitted to Cabinet.

Councillor Briggs introduced the report from the Task & Finish Groups on Financial Implications to the Council of the first wave of the Covid 19 pandemic. The Board had looked at all the financial transactions that had been undertaken by the Council, as set out in the report. He asked that paragraph 6.5.3.5 in the report be highlighted to Cabinet. This paragraph suggested that, in the event of more staff continuing to work from home after the pandemic, the Council could seek to maximise potential commercial income by letting out the empty spaces in the Plaza. He went on to say that the second report produced had considered the Council's Service Delivery within the first pandemic wave.

Councillor Patrick presented the report from the Task & Finish panel on staff and wellbeing during the first wave of the pandemic. In reply to a question regarding the percentage of the workforce who had responded to the survey which had taken place as part of this Review, The Chief Finance Officer said that the 61% response rate was both representative of the staff and proportionate. In reply to a further question, she went on to say that all staff were encouraged to talk to their team leaders regarding their home working situation, but that the current Government guidance was that if people could work from home, then they should do so. The council would pilot a new ways of working programme after the current lockdown restrictions were due to be lifted in June. This programme would offer a blended way of working, to include both home and office based options for staff.

RESOLVED: That the following recommendations from the reports be approved and submitted to Cabinet:

- 1) The Council should create a watertight plan of campaign to deal with any future Coronavirus wave or similar emergency, and this plan should then be signed off by the CEO and Senior Management so that they are fully aware of the plans in place and what their roles would be in any future emergency.
- 2) The Capita contract should be overhauled to include any such future event, allowing flexibility to the work contract so that both Capita and the Council are prepared for any further grants that may be given, so that the public know that they can rely on the system in place and have the Councils full support.
- 3) Officers, not Capita, should have the empowerment to make decisions.
- 4) Any future contracts are set up to have more flexibility in them in order to face any unexpected emergencies.
- 5) Contractors should not make statements on behalf of the Council without the Council's permission and approval.

Overview and Scrutiny Committee (31.3.21)

- 6) All businesses in the Borough should have a ratings number and that ratings list, which currently is not up to date, should be updated at regular intervals.
- 7) The overall communication of officers/Capita with the public would not have caused so many problems if they had set up extensive internet information so that questions could be provided and answered more easily.
- 8) A register of all community volunteer groups is drawn up - which includes the contact details of each group's coordinator – and is retained and reviewed–quarterly to ensure there is, at all times, a current list of any and all volunteer groups operating in the borough who could provide support to vulnerable residents.
- 9) A 'go to' document that showed best practices to be adopted by volunteers supporting vulnerable residents be produced in readiness for distribution to any and all community groups taking on this role in the borough to avoid piece-meal and late distribution of information.
- 10) Every ward councillor be made aware quarterly and again in the event of any emergency which required support to be given to vulnerable residents, of the information in the document, so they can act as a resource of information for volunteer coordinators.
- 11) During a period of community support, data showing the number of vulnerable residents being supported in each ward, or by each community volunteer group if they are covering more than one ward, is gathered on a weekly basis so that a complete picture of the extent of volunteer activity is known for ongoing and future planning purposes.
- 12) Text for a piece of printed communication material, such as a flyer, be drafted in readiness containing the information residents will need about how to access support if they find themselves requiring assistance during a period of restricted movement in the community.
- 13) The printed communication should be printed and distributed to every household in areas of the borough that become subject to any national or local restrictions of movement in the community, at the earliest possible time to ensure everyone receives the same message, especially those residents who cannot use the internet.
- 14) Communication with councillors be made as soon as is feasible once any restrictions on movement in the community are agreed, giving them the detailed information about how support will be given to their residents.
- 15) Once councillors are given the information about how support in the community will be given in their ward, they should liaise with the relevant group / organisation in order to play their part signposting,

advising and generally helping volunteer groups to support their residents. This should be encouraged by the Leader of the Council.

- 16) Councillors be included in the welfare checks. The Cabinet Lead for 'People' should ensure this happens in the event of any local or national emergency.
- 17) The current arrangements for emergency planning, including business continuity planning, be endorsed.
- 18) That the arrangements put in place to monitor the efficiency and effectiveness of the Council's health and wellbeing support to staff during the pandemic be endorsed.
- 19) That the current arrangements, including the appointment of a Client Relationship Director and Head of Strategic Commissioning, for ensuring that our commercial partnerships and contracts deliver efficient and cost effective services to residents be endorsed
- 20) That a reasonable balance is struck with staff working safely in the Plaza and that management is not overly cautious by allowing too many staff to work from home.

6 Date of Next Meeting

It was noted that the date of the next meeting would be 23rd June at 5pm.

The meeting commenced at 5.00 pm and concluded at 5.35 pm

Overview and Scrutiny Committee Work Programme

NON-EXEMPT

HAVANT BOROUGH COUNCIL

CABINET

SHAPING OUR FUTURE PROGRAMME UPDATE

FOR DECISION

Portfolio Holder: Cllr Alex Rennie

Key Decision: Yes

1. Purpose

- 1.1. This paper is submitted to provide Cabinet with information on progress with the Shaping our Future Programme (“the Programme”) and to agree next steps.

Introduction

- 1.2. The need for major change in Councils is generally driven by a combination of financial necessity, changes in the expectations of customers and the desire to improve the effectiveness and efficiency of services. When the scale of change requires co-ordinated action across managerial, technological, procedural and contractual activity, then a transformation programme is required; this is a method of getting our organisations from where we are now to where we need to be in the future.
- 1.3. Customer expectations have changed exponentially in recent years as the internet era has led to a transformation in the way and pace at which most people expect to interact with organisations. The Councils need to take steps to ensure that they are fit for the future and develop permanent capacity to continue to adapt to a changeable environment.
- 1.4. Through the Shaping Our Future Programme¹ we have an opportunity to build on the momentum created in recent months, to modernise and significantly improve

¹ [EHDC Shaping Our Future Report 10 September 2020](#)
[HBC Shaping Our Future Report 2 September 2020](#)

the efficiency of the Councils whilst delivering the improvements we want to see for our communities.

2. Recommendation

2.1. Members are requested to agree:

- a) the latest version of the Programme structure and plan (4.5, 4.10-4.14)
- b) the estimated costs and savings associated with the Programme and the relationship to the Medium-Term Financial Strategy (MTFS) (Section 3)
- c) the overarching concept of the Target Operating Model (TOM) (Diagram 1, 3.6, and Appendix 1)
- d) to drive the East Hampshire and Havant partnership to deliver maximum impact and hence opportunities for reinvestment through a more detailed analysis over the next three months (5.1-5.6).
- e) to delegate authority, in line with Financial Procedure Rule G.35, for the Director of Corporate Services to approve drawdowns from relevant reserves, up to a maximum of £383k in 2021/22, with retrospective reporting to the Cabinet via Programme updates and routine budget monitoring reports (5.3).

3. Executive Summary

3.1. In September 2020, the Councils agreed to a Shaping our Future Programme and asked the Chief Executive to report to Cabinet each quarter to outline progress, expenditure, and any delay.

3.2. Since then, the initial design of the Programme has been further developed, considering feedback and suggestions from an experienced Transformation Advisor (“the Advisor”) who was engaged by the Councils in October 2020. A summary of this feedback is provided at paragraph 4.3.

3.3. A Target Operating Model has been developed which will shape the structure and design of the Councils and each service, so that in the future

- a. We will work collaboratively with our partners, businesses and communities to create places that are prosperous, inclusive and supportive.
- b. We will be clear about the services we provide and those we don't, and the business model we choose will be the right one for customers and their Councils.
- c. Each service will understand the nature of its own demand and know when demand is preventable and where we can intervene early to stop problems from arising.

- d. We will enable people to self-serve, online, 24/7, as much as possible and integrate the use of technologies in the re-design of our services, involving our customers so we know they provide an excellent customer experience. We will derive clear benefits from the partnership between our two Councils, enabling our staff to use common systems and processes to efficiently serve the needs of the different areas.

3.4. This report therefore sets out the detail of the Programme including programme design, Target Operating Model and supporting financial information.

Programme design

3.5. The Programme design is illustrated in Diagrams 4 and 5. These show:

- a) a Programme Board - comprised of the Executive Board and an external advisor – working with Cabinets to finalise, and then own the Target Operating Model.
- b) new workstreams that will develop the products we need to deliver the Programme and reshape the organisations.
- c) a Programme Support Team – comprised of project management, business analysis, customer insight, communications, finance, and governance.
- d) the phased delivery of the programme. The four phases are:
 - I. A ‘mobilisation’ phase, in which the programme structure and all its personnel will be put in place.
 - II. An ‘exploration’ phase in which work will start on product development.
 - III. A ‘learning and scaling’ phase in which the outcomes of the exploration phase will be reviewed to ensure they are fit for purpose.
 - IV. A ‘delivery’ phase in which services will be systematically reviewed to ensure they operate in line with the target operating model and deliver the benefits of the Programme.

Target Operating Model

3.6. The Target Operating Model describes the future state of the Councils. It is an overarching concept that all sections of the Programme set out to deliver. The Model is shown in Diagram 1.

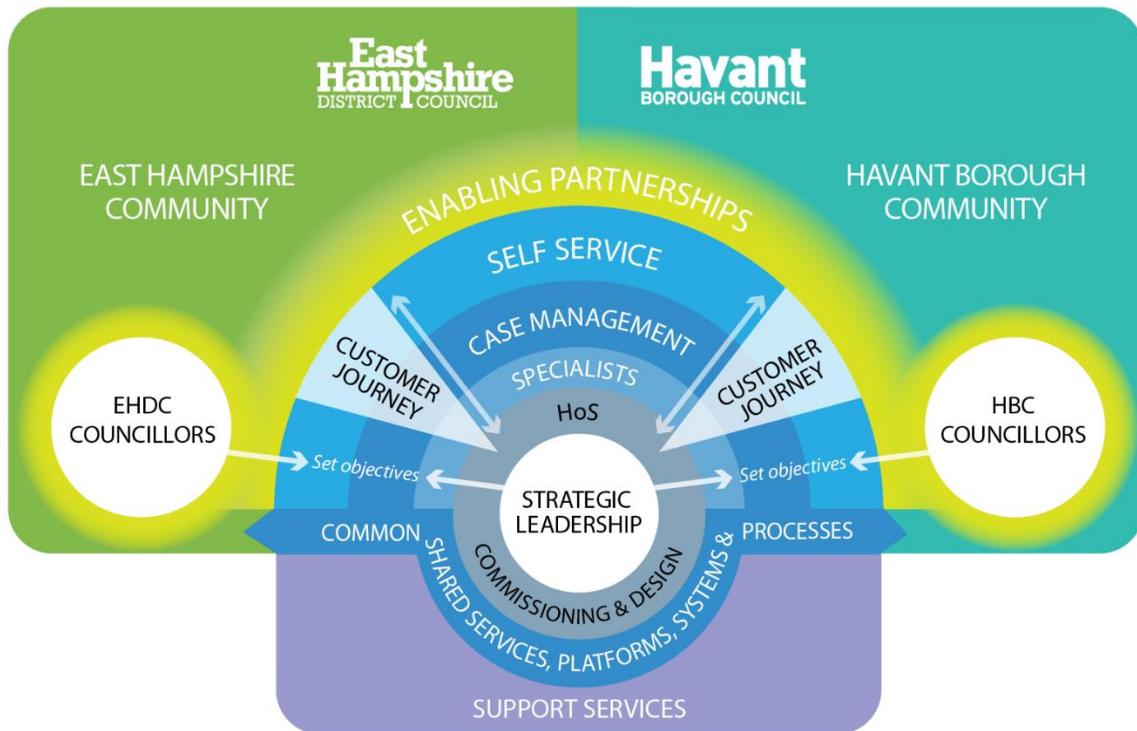

Diagram 1 – TOM

3.7. A few features of the Model should be highlighted:

- a) There are two Councils serving two communities, working in close partnership but not merging. A set of objectives, determined by elected members and detailing their vision for the two communities, is communicated to the senior managers of the organisations, Executive Board, and the Heads of Service.
- b) The goal is to operate as enabling Councils, creating prosperity, promoting resilience, and working to prevent needs arising. The goal is to enable greater self-service so most customers can get their needs met online. People who cannot get their needs met this way, for example those whose needs are more complex, will have to tell their story only once, and, if necessary, will progress to receive specialist help.
- c) The central core of support staff will ensure both organisations maximise efficiency and reap the benefits of the partnership. Standard systems and processes will be created for everyone to use.

Finance

3.8. In this programme the intention is to minimise demand, re-design systems and services in order to drive efficiency, delivering the same or more outputs and outcomes (but not necessarily in the same way) for fewer inputs. This work is

more complex than simple budget reduction targets that lead inevitably to service reductions. Hence, at this early stage of the Programme cost reductions can only be estimated.

- 3.9. Section 5 illustrates the minimum cost reductions that must be delivered by the two Councils to at least balance the currently published Medium Term Financial Strategies (MTFS). These are minimum numbers at this time, but they do illustrate that the financial sustainability of both organisations can be secured, at a minimum, if the TOM is delivered. In this scenario, it is believed that the Council's priorities, and hence those of our residents, can continue to be met albeit with different delivery mechanisms.
- 3.10. However, this Programme aims to deliver much more than the minimum and it is evident that the opportunity presented by the activities of the programme will reduce costs and create the potential for re-investment in preventative initiatives that lower demand and create greater resilience and prosperity in our communities.
- 3.11. Research undertaken to date demonstrates the benefits other authorities have reaped from similar change activities. Two such examples are highlighted below with further evidence provided in Appendix 2.

Staffing

- 3.12. The research we have so far carried out has shown that it is possible to save about 20% in staffing costs through this type of programme. Examples of organisations who have achieved around this for their programmes are:
 - a. Publica Group – reported a saving of 22% in staffing costs in their business plan. The implementation of this Teckal company by four authorities applied a radical change to service delivery model. A strong focus on improving customer contacts – using digital self-service and case management application, and plans for further digital transformation, has been enabled implementing closer sharing across the authorities.
 - b. South Somerset District Council's transformation programme commenced in 2015. The council needed to make £4.1m in savings by 2020-21 and recognised that their staffing structure, which made up 46% of total budget costs, would need to be reduced. Implementing a new Operating Model, with a focus on self-serve, case management-specialist, was predicted to provide recurring savings of £2,483,925 and a reduction in staffing of 77.3 FTE (from 460 FTE). The programme closedown report of December 2020 reports that these financial savings have been achieved.
 - c. South Hams and West Devon – set a target to achieve 24% savings in staffing costs. Their T18 programme implemented a new operating model and an organisational structure to deliver it. At the close of the programme in

December 2018, they had achieved an 18% reduction in staffing numbers (full time equivalent) since the start of the programme (July 2014).

Redesign and channel shift

- 3.13. As part of carrying out research, we contacted Bristol City Council to find out more about how their focus on enabling customer self-service, channel shift and utilising digital tools changed the way in which they deliver services to their customers. We have learnt that their approach has resulted in a reduction in the cost of handling a customer call - from £10 to £6 per call. These savings include system licence costs, staff capacity savings and management resource costs.
- 3.14. Over the next three months we will undertake analyses of the impact of the kind of activity demonstrated by the examples in Appendix 2, for the Councils. This will include for example spans and layers analysis which looks at the way an organisation delegates tasks to specific functions, processes, teams and individuals with the aim to ensure organisational efficiency and effectiveness, and activity-based costings which is a method of assigning overhead and indirect costs—such as salaries and utilities—to services.
- 3.15. These analyses will inform a detailed and robust business case prepared in the Autumn which will demonstrate what additional savings can be secured for the Councils over and above the minimum and will evidence a more aspirational, deliverable and sustainable financial target that will sit alongside the drivers of the Shaping our Future Programme. This will be set in the context of our knowledge of the history and particular circumstances in the two Councils.

4. The Programme

- 4.1. The Councils have considered several options to achieve long term financial sustainability and have decided to pursue the Shaping our Future Programme to create sustainable organisations that are fit for the future in line with delivering the Corporate Strategies.
- 4.2. The remit of the advisor was to give feedback on the initial design to help the development of the Programme and to ensure it has the best chance of success.
- 4.3. The initial feedback was that the design of the programme was strong but that it could be strengthened further by adding the following elements:
 - a. The current corporate plans describe the themes the Councils wish to focus on. They would benefit from clearer targets within those themes, describing the difference the Councils are trying to make.
 - b. Clarifying the design of the organisations by creating a Target Operating Model that specifies the future shape of the Councils.

- c. Clarifying the focus of the financial challenge, especially given the uncertainty occasioned by the pandemic, by creating optimistic, pessimistic, and middle ground scenarios of the Councils' finances. These scenarios need to account for the fortunes of government special grants, business rate collection, commercial income, and likely demand pressures. They need to emphasise the need for resilience and re-investment above and beyond the savings targets already identified.
- d. Finding quick wins to deliver short term savings that get the programme off to a successful start. This would help build momentum and deliver benefits earlier.
- e. Sharpening accountability so that Heads of Service are responsible for delivering the future shape of the organisations, and the workstream leads are responsible for producing products they will use to do that.
- f. Be clear that you are trying to create organisations capable of changing on an ongoing basis, rather than trying to reach an end point from which no further change will be necessary.
- g. Re-designing the programme workstreams to ensure that there is a clear focus, and a separation of the programme governance, programme support and programme delivery.

4.4. The Programme advances on the first design in the following ways:

- a. The Target Operating Model is owned by the Programme Board. The model becomes the guiding concept to which all workstreams and programme support teams will conform, once agreed by the Cabinets.
- b. A new Programme Support Team is established.
- c. A new set of workstreams will develop products to deliver the Programme and reshape the organisations.

4.5. The new Programme structure is shown in Diagram 4.

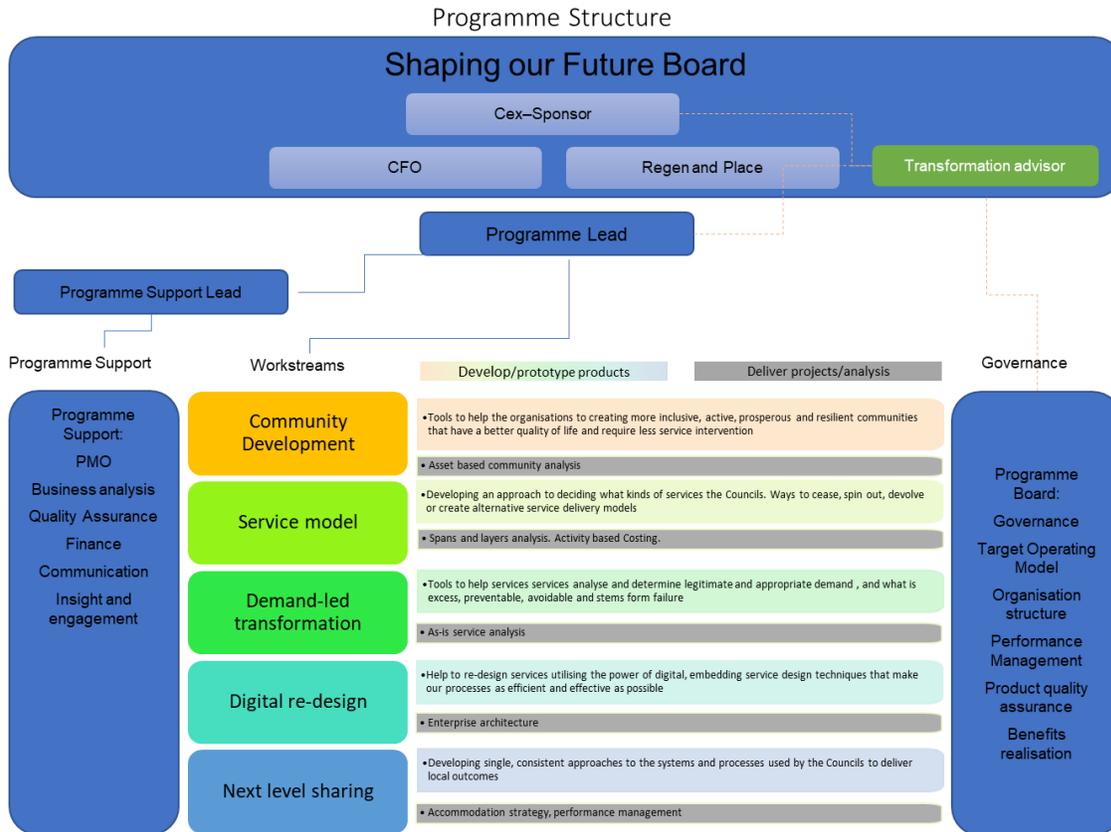

Diagram 4 – Programme structure

- 4.6. The workstreams have been developed in this way because together they will deliver modern organisations that are fit for the future. They also build on a body of evidence that is developing across the public and private sectors, the Programme does not seek to be a pioneer but a fast follower of best practice.
- 4.7. Research has already been conducted into work of other organisations. This work will continue and be developed for each of the workstreams.
- 4.8. The objective of the research is to learn from best practice, including the experiences of other local authorities. The approach taken focuses on three areas:
- a. Key Lines of Enquiry

Identifying other local authorities whose reasons for change, and their activities were like our own. Desktop research has been carried out and face to face discussions with representatives of those authorities are underway – enabling us to explore the detail behind the key points highlighted by our initial research.

A summary of the evidence to date is provided in Appendix 2, and this will be developed further into the next phase of the Programme. The case studies demonstrate that other authorities have successfully reaped benefits from similar change activities.

b. Benchmarking

There is a limit to how far we can compare our programme with one of a unitary authority, for example. It was therefore critical that we also researched authorities like EHDC and HBC. The authorities we identified for this area of research have all been through change programmes or are currently undergoing them. Our desktop research provides information which may be more closely compared to our organisations. Research will continue in this area, with face-to-face calls arranged to speak to representatives of these authorities.

c. Target Operating Model design (including case management) and general approach.

The process for designing the Target Operating Model has involved looking to other authorities to see what they were aiming to achieve, how they approached implementation, and the outcome and learnings. Case management is a key theme of many organisations we have researched.

4.9. A key next step for points a, b and c is to pull together all the information gathered so far to see what it could mean for the next stages of our programme.

Programme Plan

4.10. The Programme itself is divided into four phases, as shown below in Diagram 5.

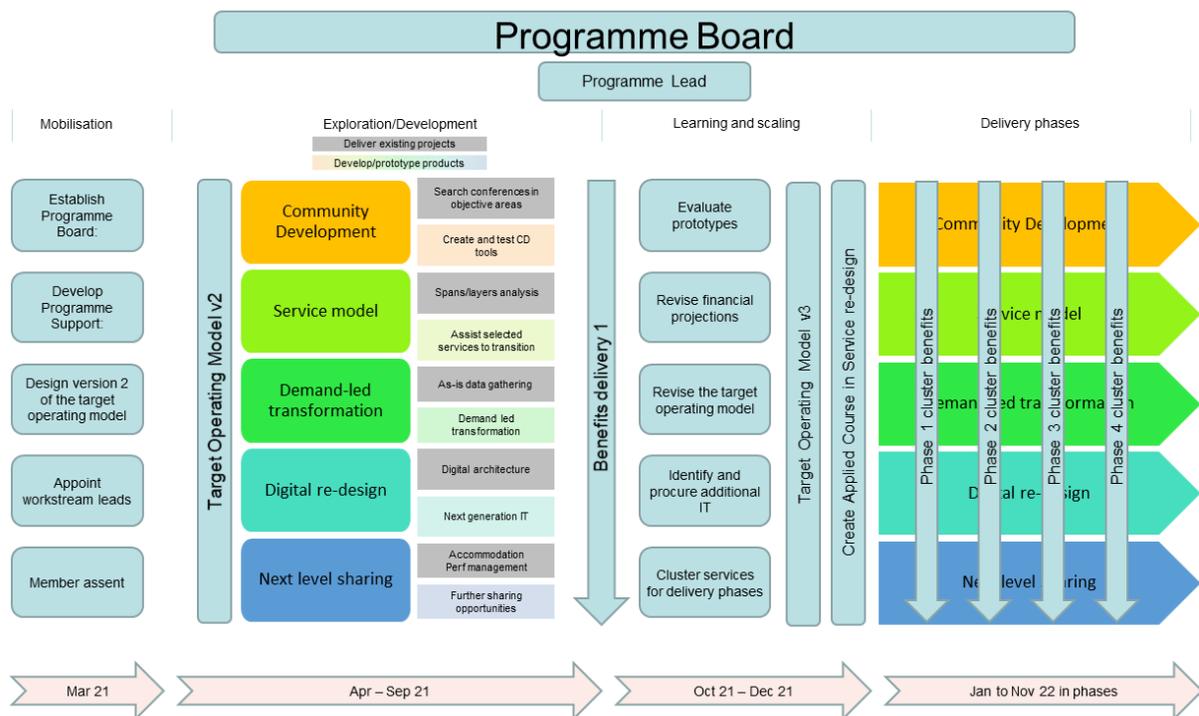

Diagram 5 – Programme phases

- 4.11. In the first, or 'mobilisation' phase, the programme structure and all its personnel will be put in place.
- 4.12. In the 'exploration' phase, work will start on product development, drawing on evidence and best practice approaches, from exemplar Councils who have experience in this area. We will then test some of these approaches which will deliver a limited number of benefits in the late autumn. In addition, we will carry out further analysis of current efficiency levels. The results of that analysis will inform the financial predictions of what benefits will be derived from the Programme.
- 4.13. By the late autumn we will be able to begin working with services to apply the approaches developed during the exploration phase. This phase is known as 'learning and scaling' and it will enable much firmer predictions to be made about costs and benefits.
- 4.14. From the late autumn, and for the following year, services will be systematically reviewed to ensure they operate in line with the Target Operating Model i.e., they serve a legitimate demand that cannot be avoided or prevented; they maximise the benefits of technology; they follow a design that meets users' needs; and they extract the maximum benefit from the partnership between the two Councils.

The Target Operating Model

- 4.15. The Target Operating Model has been developed by building on the Councils' adopted set of design principles from last year, as set out below:
- a. one workforce to maximise efficiencies.
 - b. deliver benefits for both Councils.
 - c. digital - one shared set of solutions.
 - d. align constitutions and governance structures.
 - e. outline Target Operating Model (TOM).
- 4.16. What distinguishes the Shaping our Future Programme from simple change initiatives is the simultaneous and coordinated activity across all areas of the Councils' operation. Diagram 6 sets out these areas:

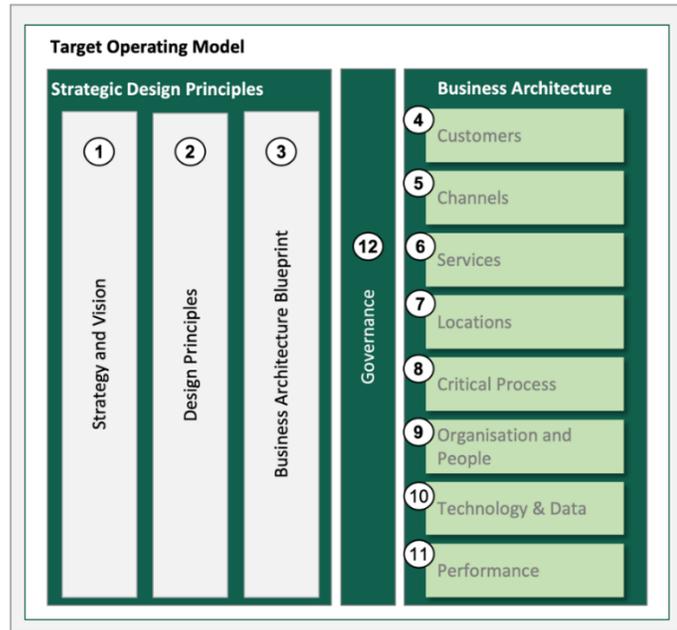

Diagram 6 – Activities

- 4.17. All this activity culminates in a Target Operating Model for the Councils and their communities that is illustrated in Diagram 1, paragraph 3.6. A detailed description is captured in Appendix 1. A few features of the model are highlighted at paragraph 3.7.

Performance Management

- 4.18. To successfully implement the Programme, we will need to strengthen accountability within the Councils. Additional work on performance management is underway to enable this.
- 4.19. The work has two core elements:
- a. The development of strategic priorities and themes into clear, measurable community-focused objectives.
 - b. The design and implementation of new ways to manage performance.
- 4.20. Subject to engagement with Cabinets and consultation with members and staff, the aim is to conclude this work by September.

5. Resource Implications

Finance Implications

- 5.1. A summary of the impact of the Programme on the current approved Medium-Term Financial Strategies (MTFS) for both Councils is provided in the tables below. To create the two scenarios, some assumptions have been made. For

example: that there is no opportunity to reduce the costs of major contracts, but that other contracts can deliver a 5% reduction in cost in 2022/23; that sales income will increase at the rate of a further 3% year on year; and that other costs can reduce by 2% in 2022/23.

- 5.2. There are also costs of delivering the Shaping our Future Programme, including funding the capital costs of infrastructure, estimated at £766k (split 50/50 across each Council) and incurred in 2021/22. In addition, if staff are made redundant then there are redundancy costs, estimated at £30k per person (a widely used Local Government Pension Scheme average), incurred in 2022/23.

Table 1 – Havant Borough Council – Potential Impact of Shaping our Future Programme.

Havant Borough Council	21-22	22-23	23-24	24-25	25-26
	£000	£000	£000	£000	£000
Published MTFS Gap	-	949	1,526	2,095	2,635
Add Transformation Costs	383	750	-	-	-
Less Transformation Results	-	-	1,618	-	2,238
MTFS Gap after Transformation	383	81	-	398	-
Cumulative MTFS Gap after Transformation	383	464	66	-	77
					5

- 5.3. Table 1 illustrates an increasing MTFS gap for Havant Borough Council over the years to 2025/26. This gap temporarily widens in the early years by the need to fund the Shaping our Future Programme and any associated redundancies (£383k and £750k, the equivalent of 25 posts respectively). In 2022/23 the Programme delivers results which begin to the balance the MTFS and offset the investment in Shaping our Future. The cumulative figures show that the budget is cumulatively in “deficit” over the period 2021/22 to 2023/24, but then returns to “surplus”. The cash flow can be managed through the careful use of reserves, which can be paid back as the Shaping our Future Programme takes effect. Hence, to allow the Programme to operate at pace, delegated authority is sought, in line with Financial Procedure Rule G.35, for the Director of Corporate Services to be able to approve drawdowns from relevant reserves, up to a maximum of £383k in 2021/22, when suitable business cases are presented. There will be retrospective reporting to the Cabinet via Programme updates and routine budget monitoring reports.

Table 2 – East Hampshire District Council – Potential Impact of Shaping our Future Programme.

East Hampshire District Council	21-22	22-23	23-24	24-25	25-26
	£000	£000	£000	£000	£000
Published MTFS Gap	-	232	861	324	332
Add Transformation Costs	383	383	-	-	-
Less Transformation Results	-	759	611	459	302
MTFS Gap after Transformation	383	608	250	135	30
Cumulative MTFS Gap after Transformation	383	225	24	111	81

5.4. Table 2 illustrates the medium-term scenario for East Hampshire District Council. For this Council, the published MTFS gap is later and smaller than for Havant Borough Council, so the Shaping our Future Programme needs to deliver fewer savings (e.g., reduction of costs equivalent to 13 posts at a cost of £383k in 2022/23) and the payback is quicker. There is still a cash flow issue to manage using reserves in 2021/22.

5.5. In addition, it is anticipated that during the current financial year (2021/22) the Programme will deliver potential additional savings for each authority provided that the Programme can gain traction and operate at pace. These potential savings were identified as part of the budget setting for 2021/22 and are currently being aligned with the Programme. There is the likelihood that additional savings will be secured over and above those planned once further business cases are completed over the coming months.

5.6. Over the next three months, additional analysis will be undertaken, and the transformation proposals will be further developed to give a more accurate picture of the potential costs and benefits of change in each service area. This information will be fed into refreshed performance management arrangements and, as the programme progresses, detailed business cases that illustrate opportunities for savings and efficiency and investment and improvement will be developed.

Programme costs

5.7. Paragraph 5.2 above notes planned Programme costs of £766k across both Councils, plus redundancy costs of £750k in Havant and £383k in East Hampshire. More detail of the estimated £766k is included in Table 4. This is the current best estimate for total cost for both Councils, based on work identified to date. Estimated capital costs are shown separately, with the revenue consequences of that investment shown within the £766k.

Programme Expenditure Havant BC and East Hampshire DC	
	Total cost
REVENUE COSTS	2021/22
2021/22	£000s
Delivery Resources	
x5 Theme leads	200
Support Resources	
Enterprise Solutions Architect	50
Project Management	11
Backfill for inhouse support resources	120
Specialist Funding	150
Transformation Advisor	100
Performance (included in 2020/21 budget)	50
Revenue cost of capital investment (based on 5-year asset life)	85
Total Revenue Costs 2021/22	766
<hr/>	
	Total cost
CAPITAL COSTS	2021/22
2021/22	
Digital Costs	424

Table 4 – Estimated Programme Costs

- 5.8. Costs will be confirmed as the Programme develops and business cases are finalised for individual work stream areas. Some costs may be contained within existing budgets and those costs not within budget will be covered through the Programme reserve. The aim is to keep additional costs as low as possible.
- 5.9. Programme costs are one-off costs while the result will have a recurring positive benefit on the financial position of both Councils. There are likely to be further digital costs, which could be capitalised, or funds utilised from earmarked reserves, and these will be calculated as part of the exploration phase.
- 5.10. The Capita contract is due to end during the 2025/26 financial year, at end of the current MTFS. At present the large costs of re-procurement are expected to be

covered by use of IT reserves and ringfencing IT savings identified within the current MTFs. More detail and financial analysis need to be undertaken following the bringing back in-house of the procurement and exchequer services. The market is currently moving more towards the option of “software as a service,” which tends to have costs weighted more to revenue rather than capital. However, the final split of costs will depend on the IT options chosen before 2025/26.

- 5.11. Options and businesses cases will be presented to each Council before procurement is taken forward.

Reserves

- 5.12. As per the budget setting paper the opening figure for Shaping our Future reserve at HBC was £0.418 million and at EHDC was £4.106 million. Final adjustments for the year will take place as part of the 2020-21 close down process, however it is anticipated that these reserves will remain at current levels. These reserves will be utilised to help pump-prime the cost of the Programme as the Programme deliverables in the current scenario will pay back the investment over the life of the MTFs. There are other reserves that could be re-allocated to support the funding of the Programme should that be necessary.

Section 151 Officer comments

Date: 26 May 2021

Given the financial challenges facing each Authority, it is essential that there is a well-governed and well-researched plan of action to address these challenges. The Shaping our Future Programme has the potential to deliver both improved services for our residents as well as significant revenue savings over the MTFs, some of which will be available for reinvestment. If delivered with determination and pace this Programme will strengthen and secure the financial stability of each of the Authorities.

The financial forecast contained within the report represents one scenario based on the published MTFs and the predicted costs of the Programme. There is, however, confidence that there are more opportunities for efficiencies presented by the two Councils working even closer together, as well within each Council. Further work will be undertaken throughout the discovery phase to ensure that service baselines, costs and savings are detailed within the financial business cases for presentation and approval by each Cabinet. This will result in a more ambitious Programme being presented in due course.

Human Resources Implications

- 5.13. The approach being taken is to use existing in-house human resource and ensure we maximise the skills of our own staff to deliver the Programme. Where we do not have the specific skills internally, we will seek external support as appropriate. The costs associated with this are covered in paragraph 5.3.

6. Information Governance Implications

- 6.1. No information governance implications arising from this report.

7. Other resource implications

- 7.1. None

8. Legal Implications

- 8.1 The Shaping our Future Programme will encounter aspects that have legal implications such as in terms of service provision, equalities human rights, staffing issues, budget, contracting and procurement. These are likely to materialise once we are through to the latter stages of the programme i.e., the delivery phase.
- 8.2 Legal Services, supported where necessary by external legal providers, are at hand to assist and advise as the programme moves forward.

Monitoring Officer comments

Date: 26 May 2021

The proposed programme is supported via governance initiatives which have been largely implemented during the course of the last financial year, including a full review and refreshment of the Councils' separate constitutions. Governance will continue to evolve, if required, with the programme to ensure compliance and resilience. Legal support and assistance will be provided going forward.

9. Risks

- 9.1. The following is a high-level risk analysis. In accordance with best practice, these risks will be reviewed and mitigated monthly.

Risk Title	Category	Identification of areas where there are significant risks	Planned Mitigation Actions
Capacity and Expertise	Quality	<p>If the Councils do not have sufficient capacity and expertise to deliver the programme there is a risk to timescales and cost of delivery as well as quality in achieving the vision, benefits, and objectives.</p> <p>Single points of failure may occur where there is insufficient cover in specific skills staff capacity.</p>	<p>Critical friend (the Advisor) assurance role to provide Strategic Projects Board with regular feedback, assurance, and recommendations.</p> <p>The Advisor network to resource expertise as required throughout the Programme.</p> <p>Rigorous management of corporate projects to ensure resources are used most effectively any issues are identified and managed early.</p> <p>Defined and resourced Programme roles for workstream leads and Programme Support ensuring capacity.</p>
Accurate Cost & savings estimates	Financial	<p>Initial cost and savings estimates are high level predictions and may vary from expectation as Programme develops</p>	<p>Further, more detailed financial analysis work is planned as the programme progresses, and further iterations of the TOM.</p> <p>Approval of Individual business cases for procurement of solutions.</p> <p>Programme governance in place to monitor and report actual costs and savings against initial high-level estimates with variances tested against business case.</p>
Pace of Programme	Timescale	<p>Quality of outcomes may be affected if the programme timescales do not allow for development of further iterations of the TOM, testing and learning from prototype development and re-design</p> <p>A pace that is too slow to deliver benefits will risk losing engagement and confidence of key stakeholders.</p>	<p>Programme Support function in place to coordinate activity, ensure progress and alert to any deviation from the plan.</p> <p>Programme Governance to monitoring delivery.</p> <p>Governance checkpoints as part of programme.</p>

Complexity of achieving savings	Quality, cost	Risk savings target are met by cutting services without careful redesign which may not fit with delivery of the vision and objectives, impacting quality.	Applied course in service redesign to ensure expertise in re design.
--	---------------	---	--

10. Consultation and communication

10.1. The Shaping our Future Programme is supported by a detailed communications strategy, supporting action plan, and stakeholder management plan. These are live documents which will be updated as we progress through the programme.

Target Operating Model

Consultation Draft: March 2021

Elements of a target operating model

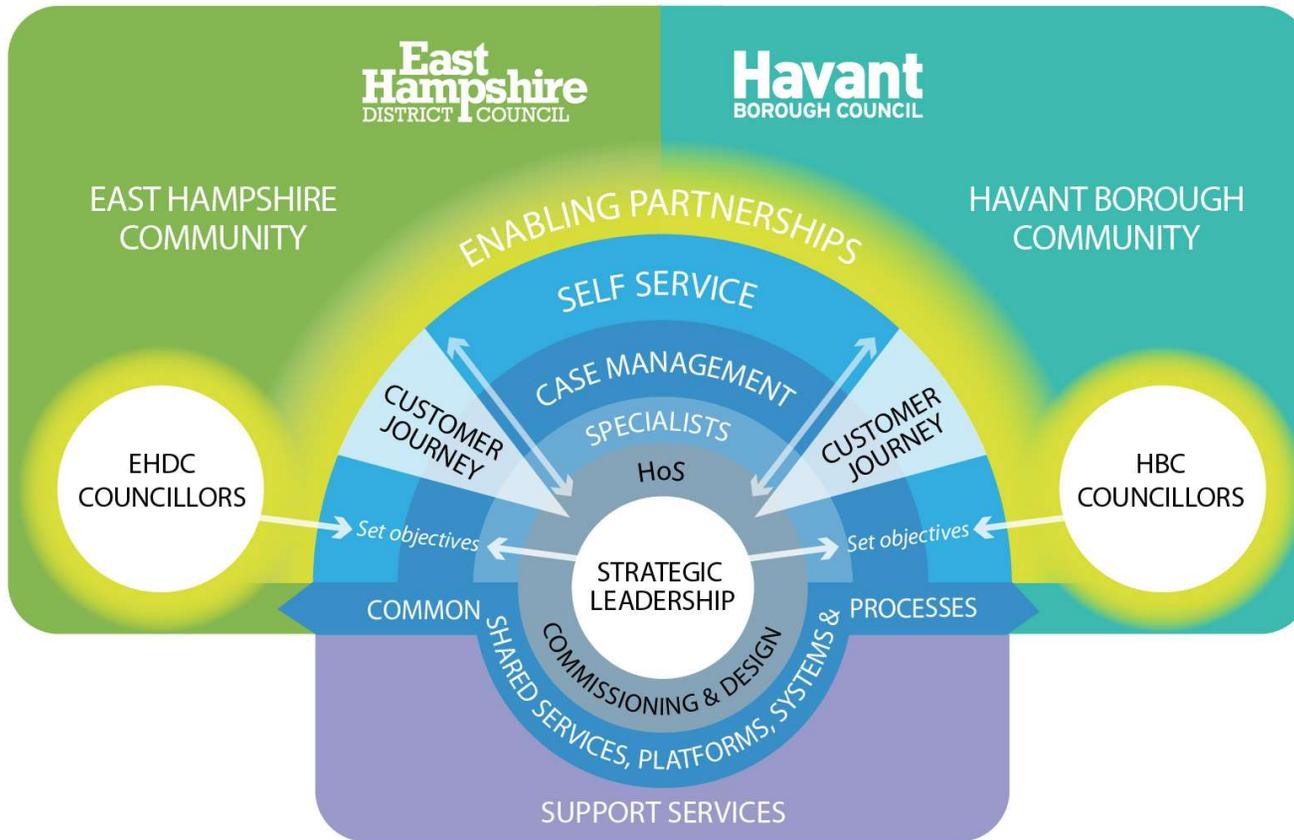

Target operating model

- ① The overall Vision and Strategy which in turn will drive the Operational Strategies (Customer, Product & Service, etc.). These strategies need to incorporate targets, objectives and standards.
- ② The Design Principles then drive the development and agreement of the core TOM design principles which should be embedded in the design of the other core TOM components.
- ③ The Business Architecture Blueprint should determine the organisation type and align its strategic objectives and tactical demands in terms of its functions, capabilities, processes and information.
- ④ The components of the business architecture are required to enable, deliver and support the business, process and technical objectives. Embedded within these components are KPIs, reports and evaluation procedures to ensure effective Performance.
- ⑫ Governance ensures strategy is aligned with design and delivery and ensures the appropriate controls and principles are in place within the TOM.

Target Operating Model

Strategy and Vision

Our **goals** are informed by the similarities and differences in local needs aspirations.

Our **vision** sets out how we want things to be and are based on political choices made by members

Our **objectives** describe the difference we want to make to the lives of people living, visiting and doing business in our communities.

Our **priorities** lead us to act in the areas that effort is most needed, based on data and evidence

Our **strategies** are evidence based and draw on best practice and innovation

Our **resources** are organised to meet our priorities.

We **measure** the impact of our efforts in the community and use this evidence to adjust and improve our approaches to local issues.

We will have the **honesty** and **courage** to act in radically different ways when the evidence demands that we change

We are **adaptive**, investing to develop the knowledge and skills we need to be able to transform ourselves accordance with the needs of our ever changing environment.

We are financially **sustainable**, with the resources to meet our goals and the **resilience** to be able to deal with shocks

Councillors and officers **work together** towards a shared vision for the future that acknowledges the differences and similarities between the two places and their councils

Design Principles

We are two organisations working closely together to collaborate where there is mutual advantage

We work to deal with the root causes of demand

- First and foremost residents and communities are enabled to help themselves
- Next we act as catalyst and facilitator, working with our partners to build community capacity.
- Where **necessary** or **required** we provide services to meet the needs and aspirations of communities

We are customer focused and act as a single organisation to meet needs that may cross more than one service

Our services are co-designed and tested to ensure they are effective in meeting their stated objectives

Our limited resources are aligned to current priorities, we draw on specialist systems, expertise skills and knowledge as necessary

We are disciplined organisations sharing common systems and processes by default and specialist systems by exception

We are internet era organisations and are open to new technologies to provide innovation for our communities

Business Architecture Blueprint

Our overarching target operating model is as a **government platform**; an organisation that draws together the networks of provision in our two communities to serve them better

We deliver services from our platform, meeting needs and achieving outcomes

We act with commercial awareness to leverage brand and assets to gain income where possible

The organisation is divided into a number of layers representing a stage on the customers journey along the customer pathway

Our culture is **'tight-loose'**; 'tight' to use common tools to promote collaboration and 'loose' to serve any difference in the needs and goals of the two Councils

Our support services cater for the needs of both Councils

We are an **agile organisation**, using data to track changing needs and responding accordingly

Customers

We serve our customers using channels that align with their resources and abilities

There is one doorway to all our services, and people are customers of our whole organisation, with personal accounts

Our customer pathway offers self-service at first and signposting to other organisations where appropriate

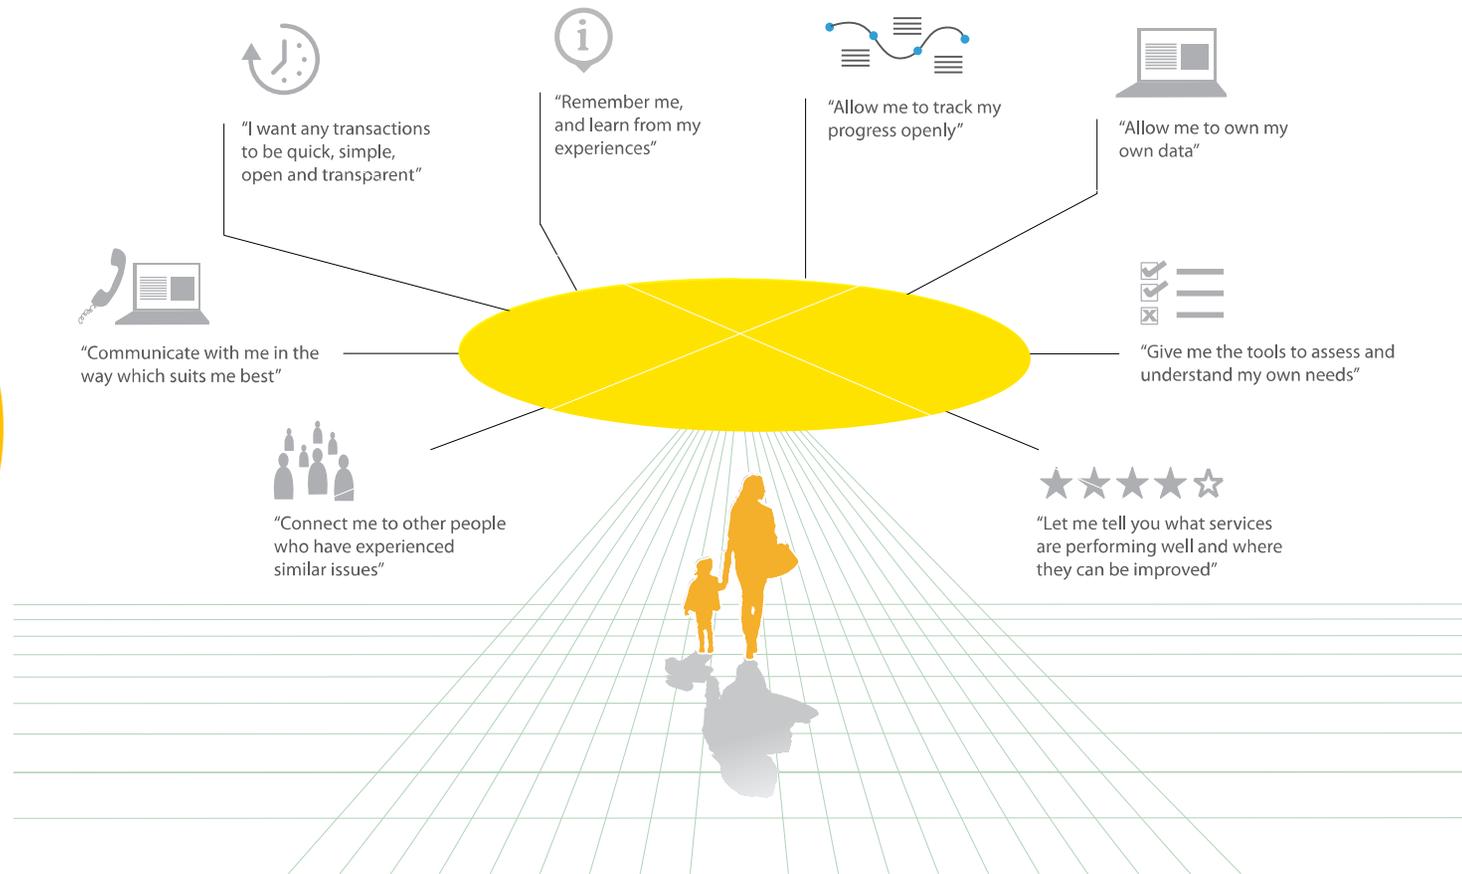

Where enquiries cannot be met by self-service, customers will have to tell their story only once

Specialists will be involved only as and when necessary

People will be able to track transactions and give feedback on their experience

Customers will input into the design of our services

Customer Vision

Channels

Our preferred channel is online and web based for those that are able to transact with the Councils in this way

We maintain telephone and face to face channels also and will provide training for greater online access to people accessing the councils in person

We maintain a presence through social media

We provide a channel to partner services

We enable forums for communities of place and of interest

Services

We provide service that meet our community objectives and our statutory requirements

We provide high quality services, co-designed with service users and monitored for their effectiveness

We work with partners to ensure that services join up to meet the needs of people

Locations

We operate from physical and virtual locations that best support customer access and our desired working practices

We recognise the progress working online and will encourage and enable this to grow

We recognise the need and benefit of maintaining a physical presence in communities and where possible will co-locate with public sector partners

Staff will work from the location that best supports their job role and our ambitions for cost effectiveness and equality and diversity in our workforce

Critical processes

Our critical processes are those that

- Relate to the decision making processes in the Councils
- Represent the high volume transactional process that determine the experience of customers
- Are common to all service across the Councils
- Enable the councils to identify and manage risks

Our organisation maps and optimises these processes to ensure efficiency and consistency

Our critical processes are supported by our IT infrastructure

People and Organisation

Our structure supports the successful delivery of our goals and contains consistent layers and spans for control

One agile and flexible workforce delivering the corporate priorities of two councils

Our people are equipped and developed to deliver the highest standards of service and continuous improvement

We promote a culture of collaboration between the two councils and the officers serving them

Our organisational structure is designed to deliver the Councils' priorities in the most cost effective and efficient way

A flexible workforce that focusses on the current priorities of the organisation

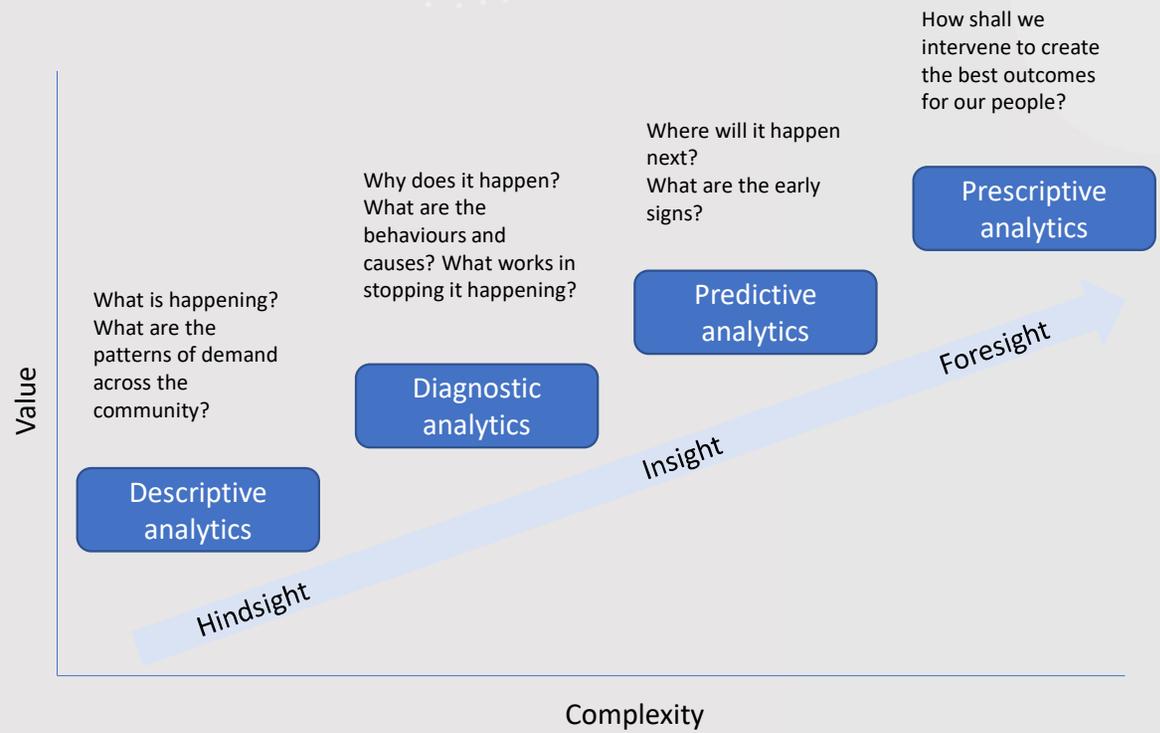

Technology and Data

Our IT is based on an enterprise wide architecture that aligns with our design principles; common systems by default and specialist systems by exception

Our IT platform is secure but not closed, we intend to create a low code platform that allows local application development

Our approach to data is to use it to understand, predict and change demand

Data Vision

Performance and reward

We are an organisation that provides high levels of challenge *and* high levels of support to all our staff

We are an objectives driven organisation that manages performance at a whole organisation, department, team and individual level

Accountability at different levels is linked by the golden threads of our objectives and values

Our employees achievements are driven by a desire to make a demonstrable difference to people's lives

Performance is based on clear leadership and lived values

Our culture enables individual innovation and collective responsibility

We are a democratic organisation that works in the service of the public

Our governance arrangements ensure that the Councils:

- Behave with integrity and demonstrate strong commitment to ethical values
- Ensure openness and comprehensive stakeholder engagement
- Demonstrate clear purpose and leadership
- Take evidence based decisions
- Have clear schemes of delegation
- Develop the capacity to achieve objectives
- Manage risks and performance through robust internal control and strong public and commercial financial management
- Implement good practices with transparency, reporting and audit to deliver effective accountability

Target Operating Model Development and the Transformation Programme

Target Area	Transformation Programme Actions	Responsibility/workstream	Design (by end)	Implement (from)	Savings contribution
Strategy and Vision	1. Develop organisational objectives	EB	Q1	Q3	
	2. Create strategies for achieving our objectives	EB Performance Management	Q1	Q3	
	3. Prioritise our activity based on our objectives	Service Model	Q2	Q3	
	4. Achieve financial sustainability in line with middle case financial scenario a) reduce people spend by x%, b) contract spend by x%, c) budget spend by x% d) increase income by x%	Overall programme	Q2	Q3(22)	
Design Principles	5. Understand nature of demand for services	Demand led transformation	Q2	Q3	
	6. Re-design services	Digital redesign	Q2	Q3	
	7. Common systems, strategies and architectures	Next level sharing	Q2	Q3	
Business Architecture Blueprint	8. Adopt the platform concept as an overarching organisational design	EB		Q2	
	9. Determine which services should be continued, divested or provided via an alternative delivery model	Service model	Q2	Q3	
Customers	10. Achieve a channel shift in favour of online self service of x%	Next level sharing	Q2	Q3	
	11. Procure and embed a single CRM system for case management	Next level sharing/digital	Q2	Q3	
	12. Enable web 2.0 platform with customer interaction and feedback	Next level sharing/digital	Q4	Q2(22)	

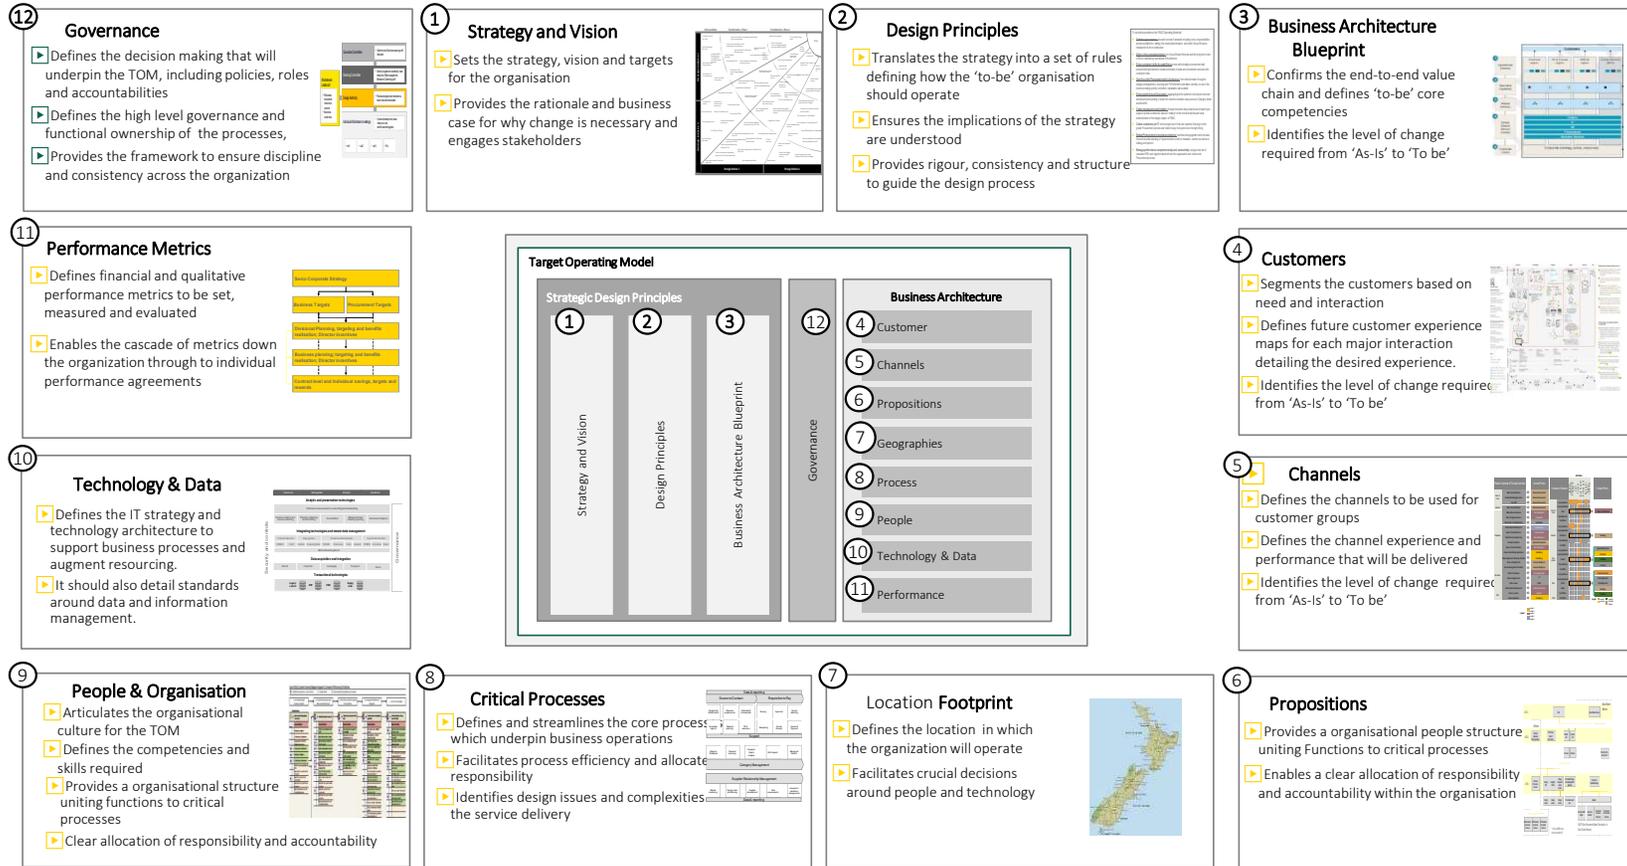

Target Operating Model Development and the Transformation Programme

Target Area	Transformation Programme Actions	Responsibility/workstream	Design (by end)	Implement (from)	Savings Contribution
Channels	13. Create pathways to partner services	Next level sharing/digital	Q4	Q2(22)	
	14. Create low code platform to host local developers	Next level sharing/digital	Q4	Q2(22)	
	15. Create forums for communities of interest	Demand led transformation/digital re-design	Q4	Q2(22)	
Services	16. Create service re-design approach	Demand led transformation/ Digital re-design	Q2	Q3	
Locations	17. Achieve a significant shift in home/remote/hybrid working	Next level sharing/digital re-design	Q2	Q3	
Critical processes	18. Map the critical process in the Councils and create consistent and efficient processes supported by IT	Next level sharing/digital re-design	Q2	Q3	
People and organisation	19. Design and implement an applied course in service re-design to support the Target Operating model	Programme	Q2	Q3	
	19. Create an organisational structure to support the implementation of the TOM based on new roles and consistent spans and layers	EB	Q3	Q4	

Target Operating Model Development and the Transformation Programme

Target Area	Transformation Programme Actions	Responsibility/workstream	Design (by end)	Implement (from)	Contribution
Technology and data	21. Create system wide IT architecture to support the TOM	Digital re-design/Next level sharing	Q3	Q4	
	22. Create a low code platform for local application development	Digital re-design/Next level sharing	Q3	Q4	
Performance and reward	23. Design and implement a performance management system at the organisation, directorate, team and individual level	EB/Next level sharing	Q2	Q2	
	24. Build transformation expectations into role descriptions for different leadership tiers	EB	Q2	Q3	
	25. Ensure performance and reward system supports the culture we want to create	EB	Q2	Q2	
Governance	26. Provide governance to the programme	EB	Q1	Q1	

Target Operating Model Template
