1	Pedunculata Oak <i>Quercus robur</i>	10	510 510	N 6 E 9 S 7 W 6	4	EM	Is situated at 1.2m above ground-small and large diameter deadwood throughout crown as well as die-back-some dangerous limbs directly above the road-open splayed habit and crown has been wind pruned by south-westerlies.	Remove all fragile dead limbs for safety reasons (TPO approval not required for this work). Consider some light crown lifting works and re-shaping to balance overhanging TPO application would be needed for these works.	>40	B1
