

Havant Borough Cabinet: 26 June 2019

Item 8: Position Statement on Nutrient Neutral Development Supplementary

Two changes are proposed to Appendix A of the items to be considered.

Paragraph 65

Proposed replacement text would be (changes highlighted in red and underline):

65. The development hereby permitted shall not be occupied until:

a) A water efficiency calculation in accordance with the Government's National Calculation Methodology for assessing water efficiency in new dwellings has been undertaken which demonstrates that no more than 110 litres of water per person per day shall be consumed within the development, and this calculation has been submitted to, and approved in writing by, the Local Planning Authority;

b) A mitigation package addressing the additional nutrient input arising from the development has been submitted to, and approved in writing by, the Local Planning Authority. Such mitigation package shall address all of the additional nutrient load imposed on protected European Sites by the development when fully occupied and shall allow the Local Planning Authority to ascertain on the basis of the best available scientific evidence that such additional nutrient loading will not have an adverse effect on the integrity of the protected European Sites, having regard to the conservation objectives for those sites; and

c) All measures forming part of that mitigation package have been provided to the Local Planning Authority.

Reason: *There is existing evidence of high levels of nitrogen and phosphorus in the water environment with evidence of eutrophication at some European designated nature conservation sites in the Solent catchment. The PUSH Integrated Water Management Strategy has identified that there is uncertainty as to whether new housing development can be accommodated without having a detrimental impact on the designated sites within the Solent. Further detail regarding this can be found in the appropriate assessment that was carried out regarding this planning application. To ensure that the proposal may proceed as sustainable development, there is a duty upon the local planning authority to ensure that sufficient mitigation for is provided against any impacts which might arise upon the designated sites. In coming to this decision, the Council have had regard to Regulation 63 of the Conservation of Habitats and Species Regulations 2017, Policy CS11 of the Havant Borough Local Plan (Core Strategy) 2011 and Policy E14 of the Pre-Submission Havant Borough Local Plan 2036*

Appendix 1

It is also proposed to amend the proposed checklist that forms the appendix to the Position Statement. This introduces the ability for planning agents to complete the checklist. Revised checklist is below:

Appendix 1: European Site avoidance and mitigation checklist

This checklist must be completed and provided in order for the Local Planning Authority to validate any planning application for one or more dwellings. It sets out how an avoidance and mitigation package will be provided to remove any likely significant effect on a European Site.

All relevant boxes should be completed and the form must be signed. If signed by an agent, it is their responsibility to ensure that the applicant is aware of the commitment to providing a mitigation package, in the form of a financial contribution, the scale of which is currently not known.

Application details	
Site name:	
Site address:	

Recreational disturbance																	
<p>The proposed development would be within 5.6 km of Chichester and Langstone Harbour, which is a Special Protection Area and Ramsar site. As such, mitigation will need to be provided. The Council considers that mitigation provided in line with the Solent Recreation Mitigation Strategy (available at www.birdaware.org/strategy) is appropriate to the applicable planning applications. This would result in a mitigation package based on the table below. It will be necessary for a suitable avoidance and mitigation package to be provided in order for the Council to lawfully grant permission for applicable schemes.</p> <table border="1"> <thead> <tr> <th>Size of units</th> <th>Scale of mitigation per unit</th> </tr> </thead> <tbody> <tr> <td>1 bedroom</td> <td>£346.00</td> </tr> <tr> <td>2 bedroom</td> <td>£500.00</td> </tr> <tr> <td>3 bedroom</td> <td>£653.00</td> </tr> <tr> <td>4 bedroom</td> <td>£768.00</td> </tr> <tr> <td>5 bedroom</td> <td>£902.00</td> </tr> <tr> <td colspan="2">Please note that a monitoring fee is attached, at 5% of mitigation cost.</td> </tr> <tr> <td colspan="2">Please note that an administration fee of £20 per application is applied.</td> </tr> </tbody> </table>		Size of units	Scale of mitigation per unit	1 bedroom	£346.00	2 bedroom	£500.00	3 bedroom	£653.00	4 bedroom	£768.00	5 bedroom	£902.00	Please note that a monitoring fee is attached, at 5% of mitigation cost.		Please note that an administration fee of £20 per application is applied.	
Size of units	Scale of mitigation per unit																
1 bedroom	£346.00																
2 bedroom	£500.00																
3 bedroom	£653.00																
4 bedroom	£768.00																
5 bedroom	£902.00																
Please note that a monitoring fee is attached, at 5% of mitigation cost.																	
Please note that an administration fee of £20 per application is applied.																	
Please select one of the following options:																	
I hereby confirm that the proposed development will include an avoidance and mitigation package in line with the Solent Recreation Mitigation Strategy.																	
An alternative approach to avoiding and mitigating the recreational impact arising out of the development is proposed (please set out in more detail in a supporting document appended to this checklist).																	
The site is located more than 5.6km from the Solent Special Protection Areas (this applies to only a small section of the Borough in Cowplain).																	

Water quality

There is existing evidence of high levels of nitrogen and phosphorus in the water environment with evidence of eutrophication at some designated sites. As such, there is considered to be a likely significant effect from residential (and similar) developments located anywhere in Havant Borough. As a result, an avoidance and mitigation package will be needed in order for the Council to lawfully grant any planning permission. The Council has published a Nutrient Neutrality Position Statement which sets out that it is possible to mitigate development in the short term.

The position statement highlights those developments which are expected to provide avoidance and mitigation on-site, thus resulting in a nutrient neutral development. It also sets out that, for any other applicable developments, the exact scale of avoidance and mitigation package (which would take the form of a financial contribution) is not yet known.

As a result, in order for the development to comply with the requirements of the Conservation of Habitats and Species Regulations and for the Council to lawfully be able to grant planning permission, it will be necessary to impose a grampian condition requiring the provision of an avoidance and mitigation package prior to the occupation of the development.

It would be the applicants risk as to whether to proceed with any development that is granted planning permission without the knowledge of the precise scale of the avoidance and mitigation package.

Please select **one** of the following options:

I hereby confirm that the proposed development will include an avoidance and mitigation package, in line with the Nutrient Neutrality Position Statement and confirm that I am content that a grampian condition is used to secure this prior to occupation.	
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

The proposed development would be 'nitrogen neutral'. A nitrogen budget is attached to this checklist (this option is particularly applicable to developments proposed on agricultural land)	
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

The proposed development is not nitrogen neutral and no avoidance or mitigation package is proposed (please note that planning permission could not lawfully be granted in these circumstances).	
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

Please select one of the following options to the right, then complete all boxes below

Signed by applicant

Signed by agent

By submitting this form to Havant Borough Council, the applicant is committing to providing mitigation packages, usually in the form of a financial contribution. If the top option for 'water quality' has been selected, the applicant specifically understands that the scale of the contribution is unknown at this time.

If an agent is signing on behalf of an applicant, it is the agent's responsibility to seek the agreement of the applicant to the commitments selected above as it will be the applicants who assumes the risk and responsibility upon the granting of any planning permission.
